

Philips Live! Invitation

You're invited to

Lung ultrasound basics in practice – dare to LUS!

Get ready to learn, share, and ignite change!

This 2 hours long webinar with lung ultrasound demonstration is aimed at physicians who are interested in using lung ultrasound in everyday practice. During the webinar you will learn how to use different tools for image acquisition and interpretation and learn how to use the ultrasound to identify, manage and monitor different lung pathologies. The hands-on program will provide you valuable information about scanning positions and many useful tips and tricks used in lung ultrasound scanning.
